3. I have discussed with [REDACTED] the proposed course for D/DA personnel and he is to give me his ideas about a presentation on operational activities. This presentation would be designed to meet the TLO's desire for an expanded treatment of the DDP offices and their responsibilities. I expect to have the revised program ready next week.

4. There has been a further development in the [REDACTED] [REDACTED] called me just before leaving town to say that there is a possibility that he will be released to the Agency after eight weeks of basic army training. This would bring him back to Washington in the first part of January. He did not know when he would learn of the decision about the length of time he must spend in camp.
